The website of Mechanism of Labour Market Diagnosis

All the interactive tables are posted on the **Mechanism of Labour Market Diagnosis** website: <https://mdaae.gr/> and are accessible to website visitors (Desktop version) through the main options menu and the thematic categories that are being developed.

Figure 1. Home Page of Mechanism of Labour Market Diagnosis

The interactive tables, created with ELSTAT data for the **Continuous increase of employees by occupation, skill level and level of education**, are presented in the thematic unit **Trends (labour market)** and more specific in the category **Continuous increase of employees**. The visitor can choose the unit and browse its contents.

Figure 2. Main options menu

Alternatively, direct access to the thematic unit is also given on the Mechanism of Labour Market Diagnosis Home page.

Figure 3. Direct access to a thematic section from the Home page

In any case, from any point the user can locate the interactive whiteboard he wishes to examine through the **Search** field in the main menu, by typing keywords linked to the title of the interactive table.

Figure 4. Search field for published analyses

For example, typing even the first letters of the word "gender" displays all the available interactive tables whose analysis refers to the variable "gender."

Figure 5. Option to type in the Search field

By opening the Home page of the thematic unit **Labour market trends**, the Contents of all categories are displayed, and with the help of the Scroll bar, the visitor can browse through all published analyses presented as thumbnails and view their interactive tables and visualizations by selecting **MORE »**

Figure 6. Thematic unit Home page: Contents of all categories

With the help of the **Filters**, the visitor can refine his search criteria and be guided more quickly to his choice based on References, Chronology and Data Sources.

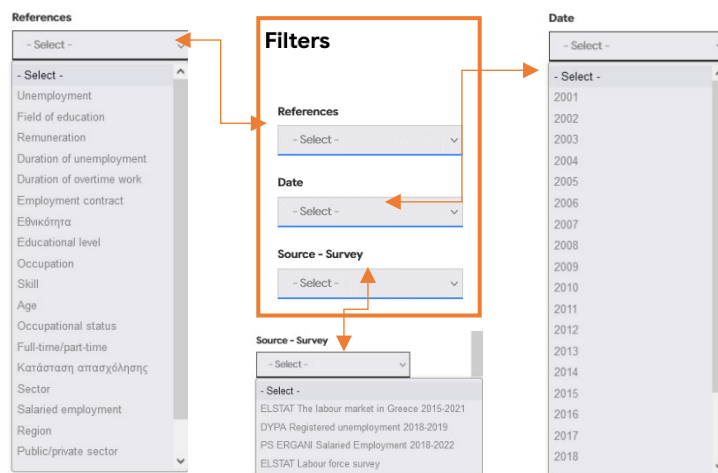

Figure 7. Search filters

In addition, it is possible to navigate to the contents of a specific category via the blue bar at the top of the screen.

Figure 8. Navigation bar in the categories of the thematic section

After choosing the interactive table of interest, the visitor is transferred to a new **working environment**, where he can see the results of the analysis and visualization of the data created using Business Intelligence software (Tableau) based on specific variables, choose a different visualization of the data, refine the analysis through the suggested filters, download the data in an Excel file (.xls) and save its current selections in an Image file (.png), an Acrobat file (.pdf) or a PowerPoint file (.ppt), features that are discussed in the next section of the manual.

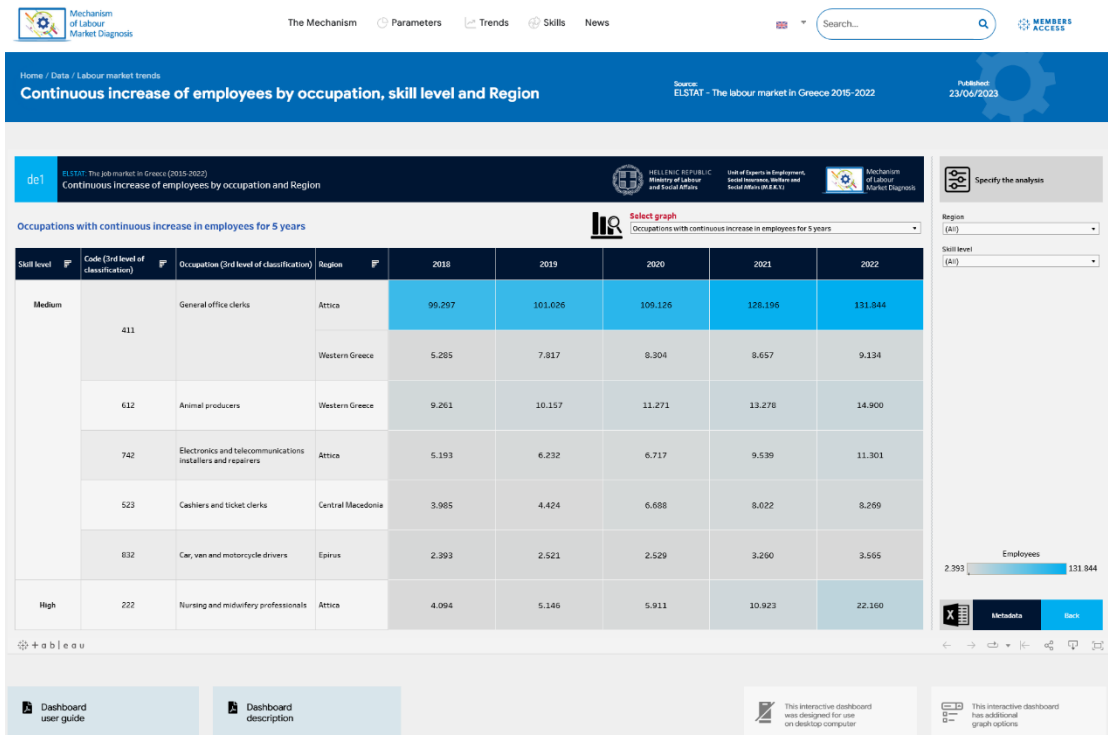

Figure 9. Working environment of Interactive table

The website visitor can also save in an Acrobat file (.pdf) the **Dashboard user guide** and the **Dashboard description**.

Figure 10. Working environment of Interactive table: User guide and Description of the interactive tables

Table **Information** (metadata) and the ability to directly access **Related data** and relevant analyzes are given in the same working environment.

Figure 11. Working environment of Interactive table: Table information and direct access to Related data

Finally, to improve the interactive tables' data display and functionality, the visitor, through an electronic form, can evaluate the usability of the respective interactive table and fill in any comments and observations.

Leave a comment

Fill out the form below to collect comments and observations regarding the specific data. This way we will be able to improve the visualization of the data as well as the overall user experience in the future.

Who are you? **Email**

How useful was the interactive dashboard for you? (0=not at all, 10=very much)

Rating: 5 out of 10

General functions of interactive tables (dashboards)

Each published interactive table (dashboard) has a set of functions and tools that help to examine and understand the data analyzed each time, based on the visualizations proposed and the filters that specialize the analysis.

Select graph

A primary function is **Select graph**. The user can choose the analysis that concerns him based on specific variables and display it on the screen using the drop-down menu and the interactive panel (dashboard) with the proposed visualization.

Figure 15. Select a graph

Figure 16. Select graph and other analysis visualizations

Analysis specialization

Filter selection

The selection filters feature in each dashboard's **Specify the analysis** section, to the right of the dashboard, allows the user to filter and display the data they want to examine, sometimes selecting one value from the single value drop-down list or more values from the multiple value drop-down list of some filters (e.g., Region). Selecting the *All* value displays all field values, while there is always the option of typing in the corresponding field of each filter for easier access, especially in long drop-down lists.

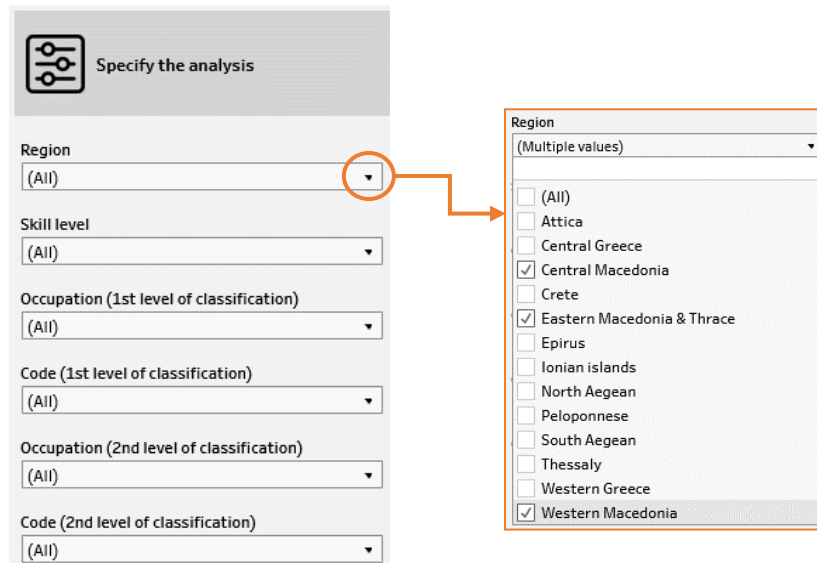

Figure 17. Analysis specialization options (using filters)

The categorization of the fields in the drop-down filter lists is done each time based on the variables that the analysis of the chosen graph examines, such as Region, Occupation and Occupation Code (1st, 2nd and 3rd level of classification - ISCO-08 classification), Age, Gender, Level of Education, Skill level, Employment Status, Sector and Sector Code (1st, 2nd and 3rd level of classification - NACE Rev. 2 classification), etc.

It is possible to combine filter options so that only the relevant values the user selects are displayed in the interactive table. So, for example, by selecting the Region of Peloponnese and the occupation Clerical support workers [Occupation (1st level of classification)], the occupation Code automatically becomes 4 and the Skill Level filter becomes Medium. In the Occupation filter (2nd level of classification), only the relevant values of the two-digit occupation breakdown are displayed. The user can further refine the breakdown by selecting one of the four values of that field: *Customer Service Clerks*, *General and Keyboard Clerks*, *Numerical and material recording clerks* or *Other clerical support workers*, to display the corresponding values in the interactive table.

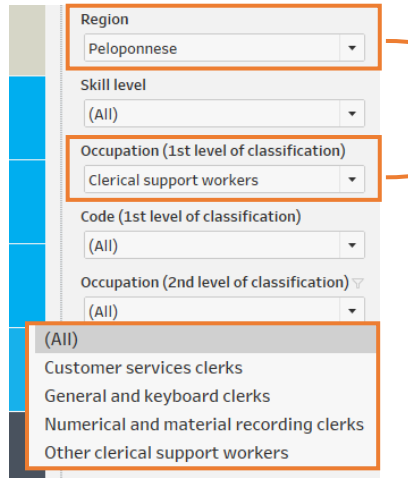

Figure 18. Analysis specialization options (using filters)

In each filter, the user can choose which values to include and which to exclude using the icon that appears when we place the cursor in the upper right corner of the filter.

Figure 19. Option to include or exclude filter values

In any case, to de-select a filter, we use the icon that appears when we place the cursor in the upper right corner of the filter.

Figure 20. Reset filters to their original state

Main functions of interactive tables

Classification of data

The data in the tables are sorted by the most recent reporting year, displaying values in descending order . However, the user can change the sort order to ascending order , choose a different reporting year, sort the data alphabetical  or in the order of the source file, by code or occupation, etc.

Skill level	Code (3rd level of classification)	Occupation (3rd level of classification)	Region	2018	2019	2020	2021	2022
Medium	411	General office clerks	Attica	99.297	101.026	109.126	128.196	131.844
		General office clerks	Western Greece	99.297	7.817	8.304	8.657	9.134
	612	General office clerks			10.157	11.271	13.278	14.900
	742							
High	523	Cashiers and ticket clerks	Central Macedonia	3.985	4.424	6.688	8.022	8.269
	832	Car, van and motorcycle drivers	Epirus	2.393	2.521	2.529	3.260	3.565
	222	Nursing and midwifery professionals	Attica	4.094	5.146	5.911	10.923	22.160

Figure 21. Data sorting options

Multiple data selection

An additional essential feature available in the individual tables of the dashboards is the possibility of multiple data selections through the combined use of the *Ctrl* key and the *left button* of the mouse.

Figure 22. Option to multi-select data (Shortcut)

Tooltip

A handy tool of Tableau is the **Tooltip**, which allows the user, by placing the mouse pointer over a value, to immediately see information about all the variables of the specific report.

Skill level	Code (3rd level of classification)	Occupation (3rd level of classification)	Region	2018	2019	2020	2021	2022
Medium	411	General office clerks	Attica	99.297	101.026	109.126	128.196	131.844
			Western Greece	5.285	7.817	8.304	8.657	9.134
	612	Animal producers	Western Greece	9.261	10.157	11.271	13.278	14.900
	742	Electronics and telecommunications installers and repairers	Attica	5.193				11.301
	523	Cashiers and ticket clerks	Central Macedonia	3.985				8.269
	832	Car, van and motorcycle drivers	Epirus	2.393	2.521	2.529	3.260	3.565
High	222	Nursing and midwifery professionals	Attica	4.094	5.146	5.911	10.923	22.160

Code (3st level of classification): **612**
 Occupation (3st level of classification): **Animal producers**
 Region: **Western Greece**
 Skill level: **Medium**
 2018: **9.261**

Figure 23. Tooltip

Additional functions

Download Excel file

By selecting **Download data**, the user can download the Excel file with the data of the interactive table through an electronic link.

Figure 24. Download Excel file

Metadata

The **Metadata** pop-up menu provides relevant information about the data source, encoding, publication frequency, and last update time.

Figure 25. Metadata pop-up menu

Back

The **Back** (to previous menu) option is available in the Tableau Server edition. It is available during the unified presentation of the thematic sections of all Mechanism of Labour Market Diagnosis dashboards.

Figure 26. Back (to previous menu)

Tableau Options Bar

After editing the respective dashboard, users can choose from the options bar at the bottom-right of each interactive table: **Undo**, **Redo**, **Reset**, **Share**, **Download** and **Fullscreen**.

Figure 27. Options bar Tableau

By selecting **Share**, a pop-up window appears that allows, among other things, to copy the link (Link) and embed code (Embed Code) in the current view (Current View) or the original (Original View).

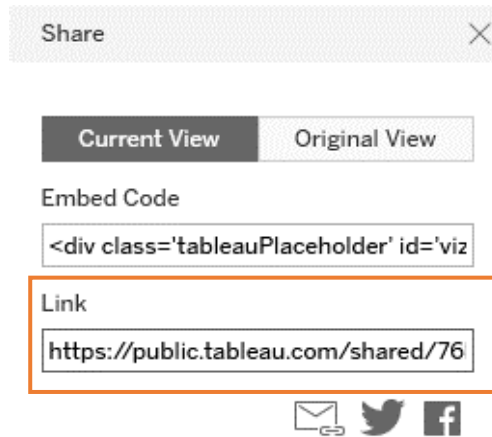

Figure 28. Share pop-up window (Share) dashboard

The dashboard data can be obtained through the **Download** option in the following formats: **Image** (.png image file), **PDF** file and **PowerPoint** file.

Occupations with continuous increase in employees for 5 years

This dashboard presents occupations at 3rd level of analysis (ISCO-08 classification) with a continuous increase in employment for 5 years by skill level and level of education for the years 2018-2022.

The table shows the occupations only for the level of education and the skill level where there is an increase in employment over time and from the corresponding filters users by making a selection, can only display the relevant results.

In the central part of the interactive table, the estimates of the employees are displayed in table form, while in the legend on the right, below the filters, the color gradation of the number of employees is displayed.

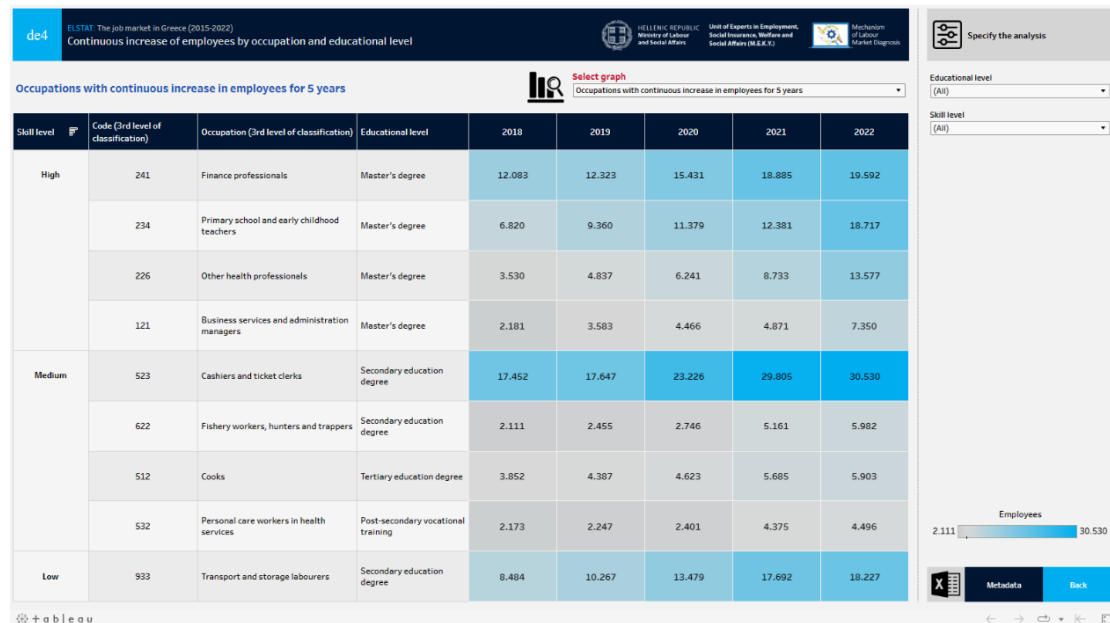

Figure 30. Occupations with continuous increase in employees for 5 years

Occupations with continuous increase in employees for 4 years or more

In this dashboard, occupations are presented at the 3rd level of analysis (ISCO-08 Classification) with a continuous increase in employment for 4 years or more by skill level and level of education for the years 2018-2022.

The table shows the occupations only for the level of education and the skill level where there is an increase in employment over time, and from the corresponding filters users, by making a selection, can only display the relevant results.

In the central part of the interactive table, the estimates of the employees are displayed in tabular form, while in the legend on the right, below the filters, the color gradation of the number of employees is displayed.

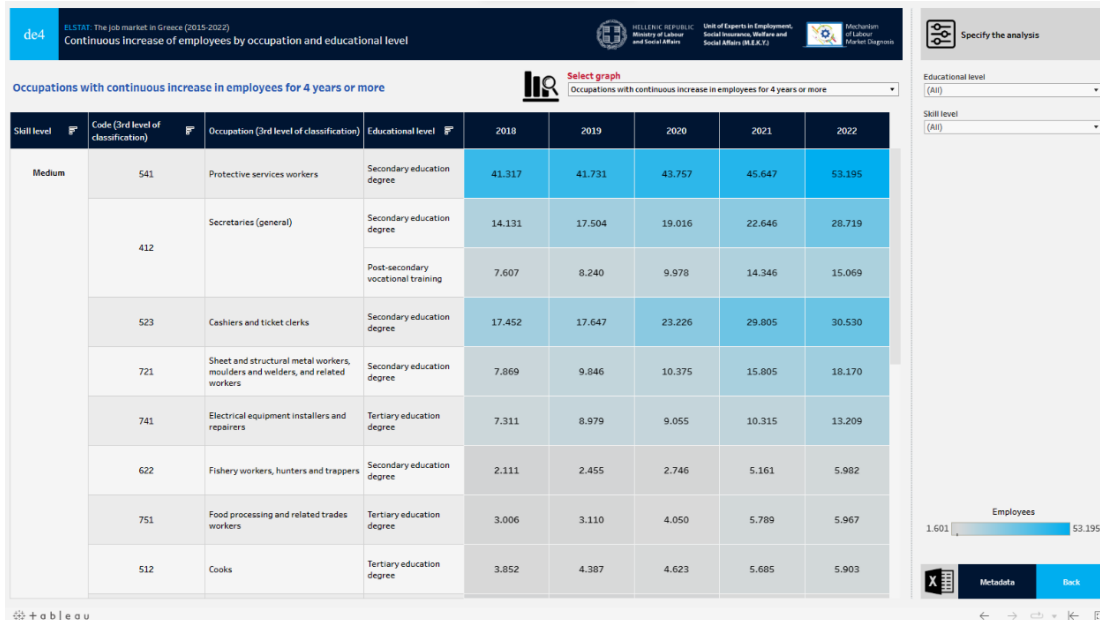

Figure 31. Occupations with continuous increase in employees for 4 years or more

Occupations with continuous increase in employees for 3 years or more

In this dashboard, occupations are presented at the 3rd level of analysis (ISCO-08 Classification) with a continuous increase in employment for 3 years or more by skill level and level of education for the years 2018-2022.

The table shows the occupations only for the level of education and the skill level where there is an increase in employment over time, and from the corresponding filters users, by making a selection, can only display the relevant results.

In the central part of the interactive table, the estimates of the employees are displayed in tabular form, while in the legend on the right, below the filters, the color gradation of the number of employees is displayed.
